

Diamond Road Smoother

Diamond Road Smoother

- All-in-one design includes water, diamond grinding, and clean-up.
- Full automation yields extremely quick setup between each bump to be ground.
- Grinds concrete or asphalt.
- Grinds marked bumps or grinds bumps directly from profilograph data.

The Diamond Road Smoother is designed for Road Smoothing

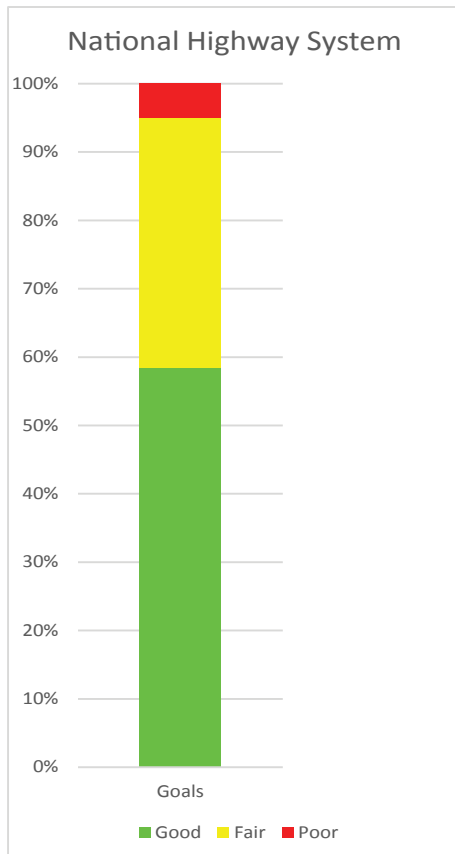

Everybody loves smooth roads. Now there is a way to smooth your roads, and keep them that way. With a grinding width of eight feet and its quick set up time, the diamond road smoother can smooth roads fast. The diamond road smoother has the accuracy and speed needed to economically smooth all of your roads.

Smooth roads save money

SMOOTH ROADS:

- Increase public satisfaction
- Increase fuel mileage
- Cause less wear and tear on vehicles
- Extend pavement life
- Last at least 10% longer
- Smooth roads are safer
- Are more comfortable to drive on, reducing fatigue
- Smoother roads save money
